FIG 14

- Automated & Sealed Verm/Composting Unit Separates Solid Wastes From Liquid.
- Waste Materials Are processed by Worms.
- Worm Castings Provide High Bred Fertiliser for Gardens.
- Liquid Waste Undergoes Primary Processing Before it Passes Through an Ozone Filter in Transit to Black Water Storage.
- Pressurized Pump Automatically Distributes Black Water.
- Water Used for Gardens and up to a Maximum 70% Re-Use in Toilet Systems.
- Black Water Storage May Also Provide a Supply for Fire Prevention Systems within Buildings.
